Deadline:

Non-EU Students: 01.October 2025

EU Students: 01. December 2025

German Students: 15. December 2025

What is Sailing into Science?

- It is an interdisciplinary course formed by various faculties of Kiel UAS.
- The course starts with an online kick-off meeting in which the topics and lecturers are introduced. Participants will be put into groups to work on specific topics.
- This group work is analysed, discussed and reflected on in online meetings and on the high seas in the western Baltic region on board a traditional sailing ship.

What we offer:

- This year's theme is **AI: Causes & Effects.**
- The groups work online on core topics connected to the theme and based in the fields of business, media, industrial and electrical engineering.
- The participants discuss their projects amongst each other on board and learn to work together while mastering life on deck.
