Garant	prof. Ing. Jaromír Gottvald, CSc.
Oblasti vzdělávání (zaměření)	Ekonomické obory

Studijní specializace

- Ekonomický rozvoj
- Mezinárodní ekonomické vztahy

O studijním programu

The Applied Economics postgraduate programme provides a prestigious Master's study that prepares highly qualified professionals, who acquire advanced abilities to assess and analyse socioeconomic issues at international, national and microeconomic level, using econometric and other quantitative techniques. The programme is comprehensive in coverage of tools and methods needed to understand complex topics related to economic policies, international economic relations, and specialised areas of economics. The ability to analyse these problems and formulate ad hoc solutions will allow participants to embark on successful careers in analytical and managerial positions within governmental organisations and public administration, local, international institutions, the financial sector, companies and research institutions. This study programme will provide graduates with the opportunity to acquire specialised knowledge and practical skills, related to common areas as well as specific courses offered within either of two specialisations (Economic Development and International Economic Relations).

Uplatnění absolventa

The Applied Economics programme offers high-quality education in economics, with a focus on practical applications in economics and business. By participating in the programme, the graduates gain wide suitability to job requirements in the public and private sector, at both national and international level.

Selected job positions of graduates of the programme typically include:

- advisor and manager in national and international institutions and organisations;
- economic advisor and head of public administration and local government institutions;
- bank and budget analyst in public administration, banks and large enterprises;
- labour market specialist / employment service analyst;
- director of businesses and institutions;
- manager in companies, consulting agencies, non-profit organisations, etc.;
- project specialist in preparation and implementation of national projects;
- researcher / assistant lecturer;
- economist in the private sector;
- specialist in company competitiveness, government bodies, and international integration groups;
- specialist and analyst in the field of foreign trade, in charge of analyses in support of the development of municipalities;

- specialist in programmes of subsidies and fiscal support for local companies and municipalities;
- project specialist in the field of preparation and implementation of international projects;
- specialist in institutions of the EU and international organisations.

Cíle studia

- To train qualified professionals in use of modern theories in economics and solving problems related to economic processes and policies, specific market conditions at micro and macro level, and economic integration and globalisation.
- To prepare specialists for management positions in local, regional and national institutions, as well as in companies and consulting agencies that operate at national and European level, in charge of formulating and implementing business plans and development projects and using up-to-date tools of economic analysis.
- To provide a broad knowledge base on a variety of interrelated subjects needed to perform specialised tasks in economist positions in support of national and international organisations, including the EU and OECD.
- To help better conceptualise the study of applied economic issues, within the current demanding and competitive environment in the Czech Republic and the global economy

Odborné znalosti absolventa
